Status: DEGRADED

tableau@tableau-server:~\$ tsm maintenance backup --file ts\_backup\_26052025.tsbak

Job id is '217', timeout is 1440 minutes.

6% - Starting the Active Repository instance, File Store, and Cluster Controller.

13% - Waiting for the Active Repository, File Store, and Cluster Controller to start.

20% - Installing backup services.

Running - Estimating required disk space.

26% - Estimating required disk space.

33% - Gathering disk space information from all nodes.

40% - Analyzing disk space information.

46% - Checking if sufficient disk space is available on all nodes.

53% - Backing up configuration.

60% - Backing up object storage data.

66% - Backing up database failed: 'java.lang.RuntimeException:

net.jodah.failsafe.FailSAFEException: org.apache.thrift.TApplicationException: Internal error processing completeStartDatabase'

73% - Stopping the Active Repository if necessary.

80% - Waiting for the Active Repository to stop if necessary.

86% - Uninstalling backup services.

An error occurred on the server generating the backup.

This job failed due to unexpected error: 'BackupRestoreWarning'

BackupRestoreWarning(message:java.lang.RuntimeException:

net.jodah.failsafe.FailsafeException: org.apache.thrift.TApplicationException: Internal error  
processing completeStartDatabase)

See

'/var/opt/tableau/tableau\_server/data/tabsvc/logs/tabadmincontroller/tabadmincontroller\_\*.log'  
on Tableau Server nodes running the Administration Controller process for server log  
information.
